What’s new in Information Management for the Florida SERT?

- FloridaDisaster.org re-development
- SERT TRAC (Training website)
- EM Constellation Phase 5
- SERT GATOR
- FloridaEvacuates.com
- Shelter Reporting
- Statewide Special Needs Registry
- State Watch Office Incident Tracker
Home / CIEM 2011

2011 CIEM Meeting

The Florida Division of Emergency Management will host the 2011 Current Issues in Emergency Management Seminar at the State Emergency Operations Center in Tallahassee, Florida on October 11-13, 2011 for the Session One. Session Two will also be held at the State Emergency Operations Center October 25-27, 2011.

Registration for Session One - October 11-13, 2011
Registration for Session Two - October 25-27, 2011

This year’s theme is “A Time to Remember. A Time to Prepare.” The goal of CIEM is to give you an overview of State Emergency Response Team operations, the Division’s programs, as well as the most current county, tribal, state and federal emergency management initiatives.

Should you have any questions, please do not hesitate to contact Nicole Holton at 850-413-0261 or via email at Nicole.Holton@em.myflorida.com. We encourage and look forward to your feedback on the CIEM sessions and use them as guidance in developing future sessions.

2010 Participant Feed Back Form

Updated:
September 14, 2011 11:41
• The Division has launched a project to redevelop the existing [www.floridadisaster.org](http://www.floridadisaster.org) website

• Teams (contractors, FDEM, and a few ESFs) gathered business and system requirements

• County Emergency Management programs were engaged through FEPA, regional meetings, and now CIEM…
FDEM and the SERT require a website that presents a distinct identity and Internet presence for these organizations while meeting the functional and informational needs of their diverse set of end users.
Project Description

- Develop a modern internet presence through an aesthetically pleasing website solution with a uniform look and feel having content and an organizational structure that is easily understandable by end users.

- The solution will employ a Web Content Management System (WCMS), document management, a media center, social media components, and subscription content.

- The solution and its content must be accessible by persons with disabilities and also available in a mobile device format.
Suggested Sample page
Suggested Sample structure

http://www.floridadisaster.org/Programs
Suggested Counties Content
{ authored & maintained by }

- “About” the County Emergency Management program (text)
- County EM Contact Info (dynamic content populated from Contact DB)
  - Links to County Shelter pages (if open)
  - Links to Disability / Special Needs Registry
  - Links to Hurricane Guide (if exists)
  - Links to Local Notification System (such as RedAlert) (if exists)
  - Other Links to County resources as desired
  - Note: this represents minimum content requirements; it is assumed that counties will expand content to meet the needs of their customers

Required FDEM Content
{ authored & maintained by }

- Evac Zones Map
- Evac Routes Map
- Storm Surge Zones Map
- Storm Tide Atlas
Feedback we’ve received so far...

- Large File Transfer appliance (county-to-state, county-to-county, state-to-county)
- Policy within Division should be to post all applicable documents – forms, policies, grant guidance – on document library
- Link to social media presence for County EM programs (Facebook, Twitter, etc)
Suggested ESF Content

- “About” the ESF (text)
- Emergency Coord. Officers Contact Info (dynamic content populated from Contact DB)
  - Links to member agency Home Pages
  - Links to other pertinent public information
  - Links to Documents (SOPs, Task Books, Guidance Docs, Job aids, etc.)
  - Links to Plans
  - Links to Training Materials
FloridaDisaster.org - Timeline

- **Business Requirements Gathering**: Summer 2011
- **Outreach**: Fall 2011
- **Purchase WCMS**: Oct 2011
- **Solicit Services**: Nov/Dec 2011
- **Create New Website**: Jan-May 2012
- **New Website**: June 2012
SERT TRAC
Training Resources and Activity Center

- replacement for current Training Calendar
- improved all current functions

- Better search tools
- Add events to Outlook calendar

- enhanced with the following features…

  - Registration – students required to register with the website
    - Attendance tracking, course reporting
    - On-demand certificate generation
    - Certification management

  - Online training – able to host (and record accomplishment) of online training
SERT TRAC Timeline

Business Requirements Gathering: Summer 2010
Development: Fall 2011
Completion: Winter 2011
EM Constellation

- EM Constellation is a web-based platform adopted by the State of Florida as an information management solution for emergency management.

- The platform allows county, state, federal and mutual aid entities to use the same operating environment when responding to and recovering from an emergency.
Integration with local EM systems

Mission / Resource - EM Constellation

FDEM EM Constellation Phase 5 Project

• Additional enhancements on the way
  – Supporting Missions and Supporting Information Messages
  – Mission and Information Message “Ribbon”
  – EEI Enhancements
  – SRMN Integration (Mission “Orders” and Status Updates)
  – Content Management Tools

• Delivery on Flash-based End User Training Materials
  – New Function Review
  – End-to-End Training on all aspects of the Software (new employee)

• User Acceptance Testing/Training held October 5th
  – Training published on SERT Training Calendar
  – Held in State EOC with remote participation via webinar and teleconference
  – 15 attendees in person, 15 remote attendees

• Next Training – November 2nd or November 4th
  – To be held at State EOC with webinar and teleconference
  – 2 sessions, 1 for all users, 1 more in-depth for train-the-trainer
EMC Phase 5 Timeline

- Business Requirements Gathering: Winter 2010
- Solicit Services: Spring 2011
- Development: Summer 2011
- Rollout/Training: Fall 2011
- Completion: Winter 2011
Changes to GATOR for the Hurricane Season 2011

Welcome to SERT GATOR
Florida State Emergency Response Team Geospatial Assessment Tool for Operations and Response
SERT GATOR contains secured map layers. Access to SERT GATOR is through EM Constellation.
FloridaDisaster.org GATOR remains available for broader access to GATOR; however, certain map layers will no longer be available there.

FloridaDisaster.org GATOR (open access - for daily operations and real-world events)
http://map.florida disaster.org/GATOR

GATOR Exercise (open access - for exercises)
http://map.florida disaster.org/GATORx

GIS Administrator
850-413-9907
GATOR

http://map.floridadisaster.org/GATOR

Geospatial Assessment Tool for Operations and Response

• web mapping application
• real-time data like weather radar, watches, storm reports
• base map, event, and post-event data
Different Versions of GATOR

• SERT GATOR
  – Specifically for members of the SERT
  – Embedded into EM Constellation and EMC Test
  – Secured website using existing credentials
  – All hazards data (NWS, USGS), traffic information (DOT/Florida 511)
  – More operational data (EMC Mission, full SERT RECON reports, Logistics)

• FloridaDisaster.org GATOR
  – Open access
  – All hazards data (NWS, USGS), traffic information (DOT/Florida 511)
  – Less operational data
User Interface Changes

- Slim tool bar
- More background map choices
- More robust navigation tools

16R GU 66002 64845
FloridaEvacuates.com

http://floridaevacuates.com

• find open shelters (from the Red Cross National Shelter System) within the State of Florida

• support for mobile devices

• identify closest open shelter using phone’s GPS and/or searching by address, city, zip, or coordinates and obtain driving directions
Mobile Application

To make it even easier to locate a shelter with your mobile, please download either the iPhone or Blackberry mobile applications below. The FloridaEvacuates.com mobile app will provide an easy way to get to the FloridaEvacuates.com mobile website (http://floridaevacuates.com/mobile/).
FloridaEvacuates.com

- Future enhancements –
  - during emergencies, integration of hotel availability in partnership with VisitFlorida.com
Shelter Reporting

• Numerous avenues to access open shelter count and population reports…
  – FloridaDisaster.org/shelters/summary.htm
  – widget in EM Constellation
  – GATOR - map.floridadisaster.org/GATOR
  – GeoRSS - map.floridadisaster.org/shelters
  – FloridaEvacuates.com

• All based upon feed from Red Cross NSS
The National Shelter System

Shelter Information Management

The Red Cross National Shelter System (NSS) contains information for over 55,000 potential shelter facilities and is used to track and report shelter information during disasters. This powerful tool enables emergency managers and disaster workers to identify the location, managing agency, capacity, current population, and other relevant information of all shelters operated in response to disasters.

NSS information assists the Red Cross, FEMA, state and local emergency management, and non-government organizations in developing strategies to ensure prompt and effective mass care services. The system also serves as a planning tool before disaster strikes.

New users to the site must self-register to access the system by clicking on the "Login" link on the left column. If you have other questions, please click on the "Help" link.
Statewide Special Needs Registry

- To assess the technical possibilities and willingness of stakeholder cooperation, the Division is conducting a survey of county EM programs regarding special needs registries and the support for a statewide system.

http://www.surveymonkey.com/s/flspecialneeds

- Responses are welcome immediately, but the survey will remain open through both CIEM sessions to encourage participation, and so will close on October 27th
SWO Incident Tracker

https://seoc.floridadisaster.org/SWO

• modernized system
  – improved incident reporting and tracking
  – SWO GATOR (visualize incidents)

• upcoming tasks
  – migrate archived data from old system
  – Integration with new notification system
On the plate…

• Get A Plan! re-development
• FDEM business plan tracking system
• ESF-specific tools
  – ESF1 port tracker
  – ESF6 meal counter
• Disaster profile/archive system
  – automate archiving of disaster information
• Sharepoint implementation
