

INTRODUCTION

Florida Incident Field Operations Guide

The State of Florida has, through a unified process of all emergency response agencies within the state, produced the second edition of Florida's all-hazard emergency response field operation guide. This guide was the first of its kind in the nation to incorporate all facets of our emergency response program.

The Florida Incident Field Operations Guide uses NIMS as the management system to coordinate Florida's total response to emergency incidents statewide.

The State of Florida thanks the many emergency response disciplines involved with the revisions of this guide.
